1. Overview

ENERGY STAR® Portfolio Manager® (Portfolio Manager®) is a free tool that helps large building owners track and report electricity usage automatically.

Toronto Hydro offers a data exchange service that enables monthly electricity data to be uploaded directly to your Portfolio Manager® account. Here's how it works:

1. Create or log in to your Portfolio Manager® account. (Have your Toronto Hydro account information ready.)
2. Submit a connection request to Toronto Hydro.
3. Submit a property share request to Toronto Hydro.

Note: Toronto Hydro can't aggregate usage data from multiple buildings. If needed, use the campus reporting option in Portfolio Manager®.

Important: If your building doesn't meet the eligibility requirements for automated data exchange, you can request manual data aggregation by completing our [Data Request: Reporting Energy Consumption form \(PDF, 121 KB\)](#).

2. Setup instructions

This section explains how to enable automated electricity usage data exchange between Toronto Hydro and Portfolio Manager®.

2.1 Create a Portfolio Manager® account

If you don't already have an account, visit [Portfolio Manager®](#) to create one.

Add properties

If you don't already have your properties set up in Portfolio Manager®, click **Add a Property** from the MyPortfolio home page for each building.

- Fill out the required fields, such as building type, address, year built, gross floor area and occupancy

You don't need to enter an electricity meter number — one will be automatically generated for your account, even if you've already created one manually.

2.2 Connect to Toronto Hydro's data exchange service

Once logged in, submit a connection request to Toronto Hydro's data exchange service to begin authentication.

Important: The person submitting the request must be authorized by the building owner and have the following building information ready:

- **Toronto Hydro Account Number** for the building's common area
- **Service Location postal code** (note: this is different from the mailing address and is not shown on your electricity bill)

Follow these steps to complete your connection request:

STEP 1

Log in to your Portfolio Manager® and click **Contacts** in the top-right corner.

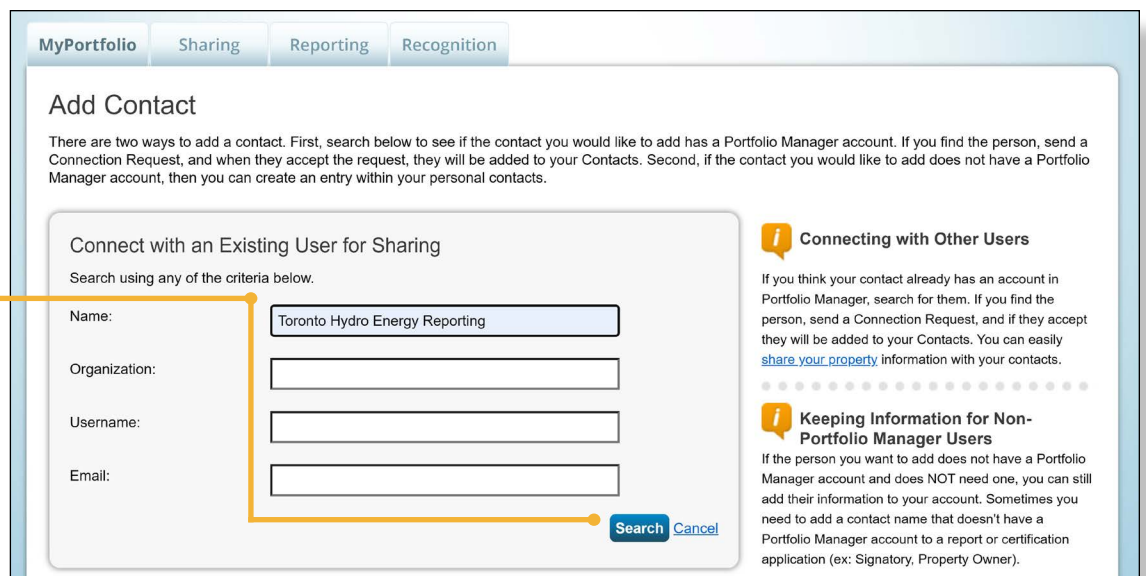

STEP 2

Select **Add New Contacts/Connections**.

STEP 3

In the name field, type **Toronto Hydro Energy Reporting** and click **Search**.

STEP 4

From the search results, locate **Toronto Hydro Energy Reporting** and click **Connect**.

Search Results

The results of your search are listed below. Clicking "Connect" will send a request to the person asking them to confirm your request to add them as your contact. If they accept, you will see them listed as a connected contact in your address book. If they do not accept, or have not accepted yet, you will see them as an unconnected contact in your address book. Connecting with contacts will make it easier to share property information within Portfolio Manager.

Send a Connection Request to [Toronto Hydro Energy Reporting](#) to Begin Exchanging Data

[Toronto Hydro Energy Reporting](#) requires the following information in order to complete this information, please contact [Toronto Hydro Energy Reporting](#) and/or meters with them to get started exchanging data.

Toronto Hydro Account Number: 0123456789 Example: 1
Enter 10 digit Account Number found on your Toronto Hydro bill.

Postal Code: M2M 3T3 Example: M2M 3T3
Enter postal code associated to the Account Number.

Terms of Use:

IMPORTANT: Before clicking "Send Connection Request", please carefully read and agree to all the terms and conditions by checking "I agree to Terms and Conditions". If you do not agree to the terms, click "Cancel" to exit.

STEP 6

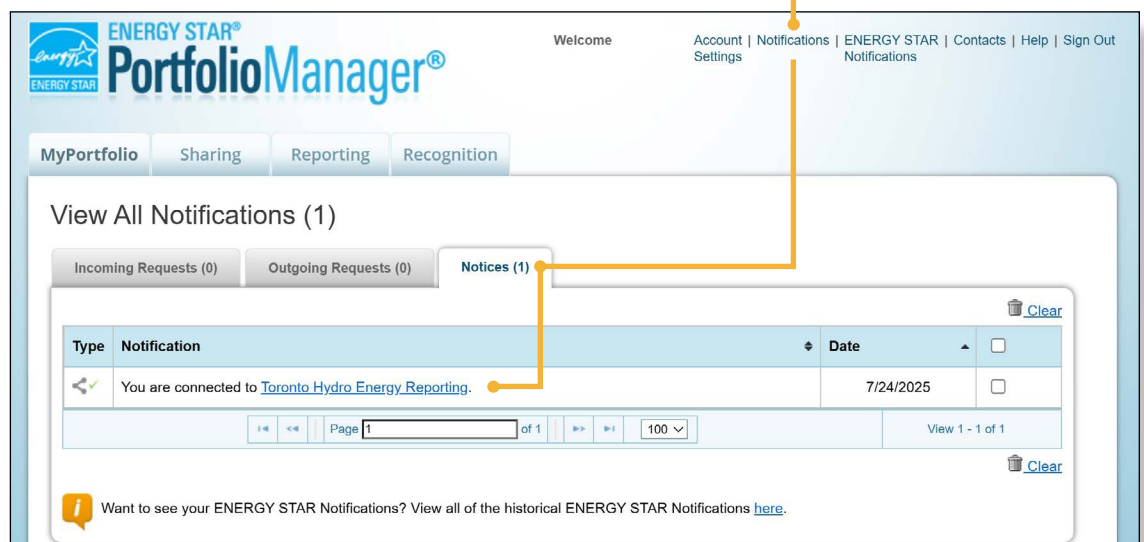

To view your pending request, click **Notifications** in the top menu, then go to the **Outgoing Requests** tab.

The screenshot shows the ENERGY STAR Portfolio Manager interface. The top navigation bar includes 'MyPortfolio', 'Sharing', 'Reporting', and 'Recognition'. The 'View All Notifications (1)' section has three tabs: 'Incoming Requests (0)', 'Outgoing Requests (1)', and 'Notices (0)'. The 'Outgoing Requests (1)' tab is selected. Below the tabs is a table with columns for 'Type', 'Notification', and 'Date'. A single notification is listed: 'You have sent a connection request to Toronto Hydro Energy Reporting. Once they have accepted the request, you will be able to share properties with Toronto Hydro Energy Reporting.' The date is 8/7/2025. There are 'Cancel' and 'Clear' buttons for this notification. At the bottom right, there is a 'Close' button.

STEP 7

Once your connection is approved or rejected, you'll receive a notification in Portfolio Manager®. This can be found under **Notices** in the **Notifications** section.

The screenshot shows the ENERGY STAR Portfolio Manager interface. The top navigation bar includes 'MyPortfolio', 'Sharing', 'Reporting', and 'Recognition'. The 'View All Notifications (1)' section has three tabs: 'Incoming Requests (0)', 'Outgoing Requests (0)', and 'Notices (1)'. The 'Notices (1)' tab is selected. Below the tabs is a table with columns for 'Type', 'Notification', and 'Date'. A single notification is listed: 'You are connected to Toronto Hydro Energy Reporting.' The date is 7/24/2025. There is a 'Clear' button for this notification. At the bottom, there is an information icon and a message: 'Want to see your ENERGY STAR Notifications? View all of the historical ENERGY STAR Notifications [here](#).'

2.3 Share your properties with Toronto Hydro

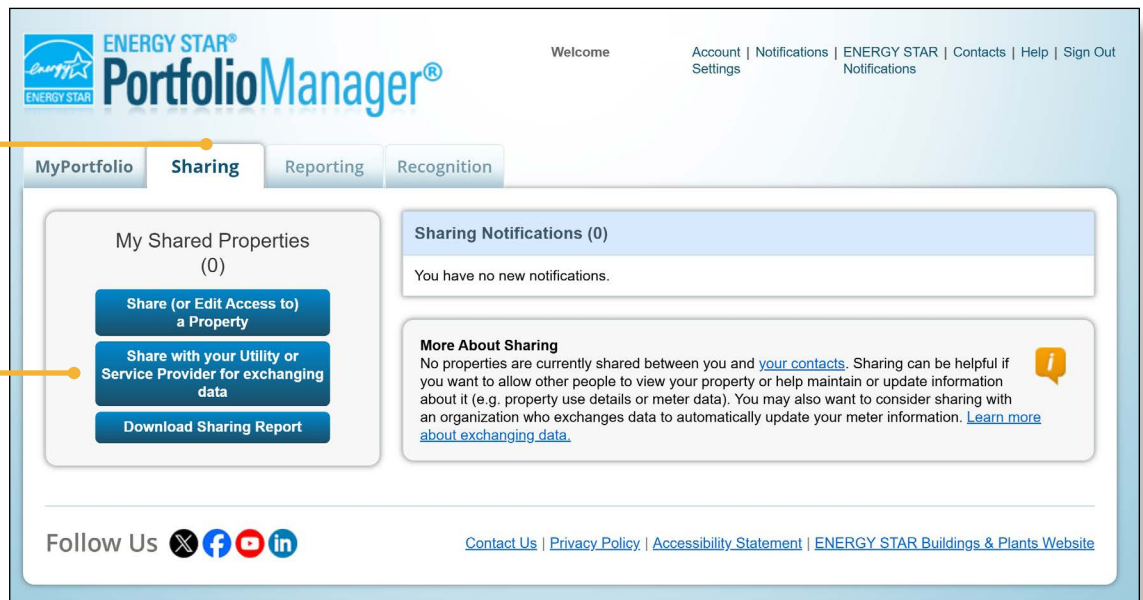

To begin receiving your monthly electricity data through Portfolio Manager®, you'll need to share each property using the built-in sharing feature. This creates a secure connection for ongoing data exchange. Before you begin, please ensure your connection request has been approved.

Note: A single connection enables you to share multiple properties — even if they have different account numbers or addresses. You can submit multiple share requests under the same connection.

Follow these steps to share your properties and start receiving data:

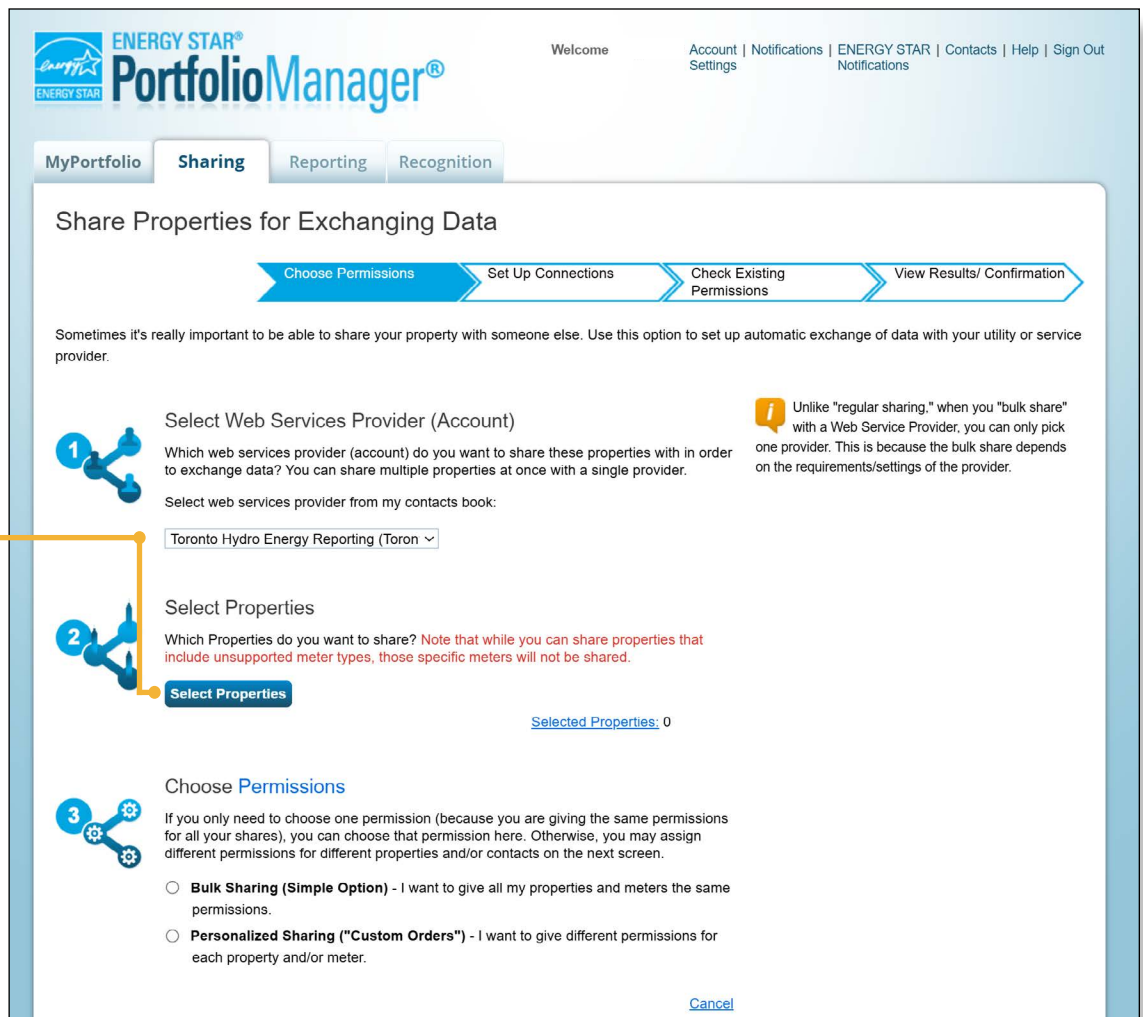

STEP 1

In Portfolio Manager®, go to the **Sharing** tab and select **Share with your Utility or Service Provider for exchanging data**.

STEP 2

Under **Select Web Services Provider (Account)**, select **Toronto Hydro Energy Reporting** from the dropdown menu. Then click **Select Properties**.

STEP 3

After clicking the **Select Properties** button, a pop-up window will appear. Check the box for each property you'd like to share. Only select properties that meet the eligibility criteria. Then, click **Apply Selection**.

Share Properties for Exchanging Data

Choose Permissions → Set Up Connections → Check Existing Permissions → View Results/Confirmation

Sometimes it's really important to be able to share your property with someone else. Use this option to set up automatic exchange of data with your utility or service provider.

1 Select Web Services Provider (Account)

Which web services provider (account) do you want to share these properties with in order to exchange data? You can share multiple properties at once with a single provider.

Select web services provider from my contacts book:

Toronto Hydro Energy Reporting (Toron)

2 Select Properties

Which Properties do you want to share? Note that while you can share properties that include unsupported meter types, those specific meters will not be shared.

Select Properties

Selected Properties: 2

3 Choose Permissions

If you only need to choose one permission (because you are giving the same permissions for all your shares), you can choose that permission here. Otherwise, you may assign different permissions for different properties and/or contacts on the next screen.

Bulk Sharing (Simple Option) - I want to give all my properties and meters the same permissions.

Personalized Sharing (“Custom Orders”) - I want to give different permissions for each property and/or meter.

Set Permissions Cancel

STEP 5

On the Share Your Property(ies) page, select **Exchange Data** for each property and a pop-up window will appear.

Note: If your Portfolio Manager® account is not the Property Data Administrator, you may be asked to connect **Toronto Hydro Energy Reporting** to the **Property Data Administrator** on their behalf before continuing.

In the pop-up window, enter the following information:

- **10-digit common area account number** (including leading zeros)
- **Service location postal code** (note: this may differ from the billing address)

Permissions

- For **Property Information**, select **Full Access** permission
- For **Meter Information**, select either **None** or **Read Only Access**

Scroll to the bottom of the page to view more items.

Next steps

After we receive your property share request, Toronto Hydro will:

- Email the primary account holder with the request details
- Confirm the share through a notification in Portfolio Manager®
- Add an Electric Grid Meter for your property in Portfolio Manager®

Data uploads

Within one to two weeks, we'll start monthly uploads of up to two years of historical electricity data.

Review your data

Check for duplicate meter records. New meters aren't automatically included in your building's performance metrics, so update your settings if you'd like to add them.

1. Go to the **Energy** tab.
2. Select **Change Meter Selections**.

The screenshot shows the 'Energy' tab in the Portfolio Manager interface. On the left, the 'Meter Summary' panel indicates 3 energy meters total, with 2 used for metrics and 1 not used. Below this is a 'Five Ways to Enter Bill Data' section with instructions. The main area features a line chart titled 'Energy Use by Calendar Month (Not Weather Normalized)'. A modal window titled 'Meters - Used to Compute Metrics (3)' is open, displaying a table of active meters. Below it, a section for 'Additional Meters - Not Used in Metrics (1)' shows a table with one inactive meter. A 'Tip' box on the left provides advice on updating custom field values.

Meter Name Portfolio Manager Meter ID	Energy Type	Most Recent Bill Date	In Use? (Inactive Date)
Electric 24987385	Electric - Grid	01/01/2020	Yes
Natural Gas - Pool / Gaz naturel - Piscine 24987386	Natural Gas	01/01/2020	Yes
Natural Gas / Gaz naturel 24987387	Natural Gas	01/01/2020	Yes

Meter Name Portfolio Manager Meter ID	Energy Type	Most Recent Bill Date	In Use? (Inactive Date)
Electric Grid Meter 25091484	Electric - Grid	02/01/2025	Yes

Tip: If you update custom field values like account numbers or postal codes, un-share and re-share the property to keep uploads running smoothly.

3. Additional information

Property transfers

Portfolio Manager® allows you to transfer property ownership to another user — such as a new property manager. The new user must already be connected to Toronto Hydro. If they're not, data exchange will be paused and require additional support to resume.

The new user will receive a transfer notification in Portfolio Manager®. They should select **Connect Now with Provider** to maintain data sharing. Please allow up to two business days for the transfer to be completed.

Important: The new user shouldn't click **Remove Provider's Access** — this will stop data sharing permanently.

The screenshot shows the ENERGY STAR Portfolio Manager interface. At the top, it says "Welcome JRaymond" with links for Account Settings, Notifications, ENERGY STAR Notifications, Contacts, Help, and Sign Out. The main heading is "Accept Transfers for Properties Managed by Web Services". Below this, a paragraph explains that the user has selected to accept a transfer request for a property currently managed by a Web Services Provider. A table follows with three columns: "Web Services Provider Name", "Connect Now with Provider (Property will be transferred)", "Connect Later with Provider (Property will NOT be transferred)", and "Remove Provider's Access (Property will be transferred)". The first row shows "Toronto Hydro Energy Reporting" with a radio button selected under "Connect Now". Below the table are "Accept Transfer" and "Cancel" buttons. To the right, a "Don't Have This Information?" section provides instructions on how to handle missing information. At the bottom, there are social media links and footer text including "Contact Us", "Privacy Policy", "Accessibility Statement", and "ENERGY STAR Buildings & Plants Website".

Web Services Provider Name	Connect Now with Provider (Property will be transferred)	Connect Later with Provider (Property will NOT be transferred)	Remove Provider's Access (Property will be transferred)
Toronto Hydro Energy Reporting	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Meter data information

Toronto Hydro's data exchange service reports electricity usage using metered kWh consumption. To calculate the bill amount, which includes both actual consumption and line losses, multiply the reported value by the Loss Factor Adjustment shown on the bill.

Troubleshooting

If you experience any issues with Toronto Hydro's data exchange service, please email us at EnergyReporting@torontohydro.com or call us at **416-542-8000**.

4. Frequently asked questions

Eligibility

Can any building owner automatically subscribe to Toronto Hydro's data exchange service?

In some cases, building owners may not have a direct relationship with Toronto Hydro — for example, they may not be the holder of any common area account — and can't enroll unless they obtain the account number and service location postal code for the building's common area account. In these situations, they can request manual data aggregation by completing our [Data Request: Reporting Energy Consumption form \(PDF, 121 KB\)](#).

Can a building owner with only one account use Toronto Hydro's data exchange service?

Yes, as long as the building is over 10,000 square feet.

Can a tenant's account holder register for Toronto Hydro's data exchange service?

No, only building owners are eligible, unless the tenant owns the sole meter in the building.

My building has multiple property locations under one account. Is it eligible?

Yes. If those property locations belong to the same property parcel, we aggregate the multiple units even if they have different street addresses.

Portfolio Manager® overview

Is there a cost to use this service?

No, this is a free service for eligible Toronto Hydro building owners.

Does this service extend to my other utilities, such as natural gas and district energy?

No, it only applies to electricity accounts served by Toronto Hydro.

What happens to Toronto Hydro's data exchange service when a building is sold?

When a building is sold, a new Toronto Hydro account is eventually created for the new owner and the existing data exchange service is terminated. More details are available in the [Property transfers](#) section.

Can Toronto Hydro access and update my Portfolio Manager® account?

No, we don't have access to your Portfolio Manager® account and can't make any changes on your behalf. We're responsible for providing a data exchange service — which means uploading your usage data to your Portfolio Manager® account. For help using Portfolio Manager®, please visit the [ENERGY STAR® Portfolio Manager® website](#) for further assistance.

Data uploads

How soon after submitting a share request does my data get uploaded to Portfolio Manager®?

Usage data uploads typically begin within one to two weeks after a successful share request.

How often is new data uploaded to Portfolio Manager®?

Your energy data is updated monthly, but there's a three-month delay to ensure all meter readings are included. For example, if you sign up on September 1, the most recent data available will be from May.

How is monthly consumption calculated?

Toronto Hydro prorates meter readings based on the dates they were taken, then calculates the total monthly consumption by combining those values.

How do I know that all my meters' data has been included?

The total meter count will be emailed to the primary account holder. Meters that track energy you produce — like solar — are counted, but they don't add to your total energy consumption.

What happens if a tenant account becomes inactive or new tenants move in?

Inactive accounts stop uploading data. New or transferred accounts are automatically included in future aggregations.

Account details

When sharing a property, how do I identify the common area account?

Search for an account without a suite number, or terms like “common,” “house,” “garage,” “elevator” or “fire pump” in the account name. Without a clear anchor account, data exchange can’t be connected.

Is it okay if the address in Portfolio Manager® is different from my Toronto Hydro account?

Yes. We use the address on the Toronto Hydro common area account — not the address listed in Portfolio Manager®.

What if I entered incorrect account details or need to update them later?

If the account number and service location postal code listed in Portfolio Manager® don’t match Toronto Hydro’s records, the data upload will fail. To correct this, you’ll need to un-share the property and re-share with the correct, up-to-date account details.

Special metering cases

How are meters for renewable energy generation handled?

Meters that track renewable energy generation are included in the total meter count, but excluded from net electricity consumption calculations.
